

Master of Education (M.Ed.)

Postgraduate Program in Education

Program details

Full time | Two-year | Four Semesters | 50 Seats

About

This program is specially designed for those seeking to pursue a career in Education and Teaching. It is a two-year program that enables the student to develop research skills, leadership qualities and strategies for educational management.

MEd NCTE approved vide Letter no. 325108/323131 dated 14.07.2009

The core courses offer broad understanding of philosophy, sociology, psychology in education and research methodology. Gender, disability and marginalisation issues are focused and critically reflected across the core and specialisation courses. ICT and educational technology is integrated in various courses of the program. Workshops, seminars and other field-based activities form an integral part of the MEd program.

Specialisation Courses

These are directed at one of the school stages i.e. elementary (up to VIII), or, secondary and senior secondary (VI to XII) and each of them with:

1. Core courses - within elementary/secondary specialisation by mapping the area
2. Specialisation/elective clusters in thematic areas such as:
 - Curriculum, pedagogy and assessment
 - Policy, economics and planning
 - Educational management and administration
 - Education for differently abled
 - Education Technology, etc.

Specialisations courses are focused combining practical, research and theoretical understanding. Emphasis is put on hands-on experience through mandatory internship, dissertation and seminar.

A candidate admitted to the MEd course shall undergo a regular course in the School of Liberal Studies and Education for one year. The total credits for the course are 82.

The program is best for

Aspiring Teachers | Entrepreneurs in the field

Learning outcomes

At the end of two-year program the student shall:

- Develop as competent Teacher Educator /Educational Manager/Education Technologist, Independent Researcher/Curriculum Developer
- Develop deep knowledge and expertise in the chosen area of specialisation
- Develop deep understanding of the field of education

Features of the program

- Emphasis in hands-on work and apprenticeship
- Strong practice content
- Intensive interaction with a pre-primary school
- Education laboratory offers opportunity to connect with the community, solve and document educational problems
- Extensive use of technology in education
- Placement assistance

Eligibility

Candidate possessing B.Ed. Degree from any recognised University in the country. Candidate should have obtained minimum eligibility i.e., 55% (50% for SC and ST) as per the norms of NCTE.

Evaluation

Evaluation is continuous and comprehensive based on varied assessment techniques such as group presentations using different formats like power point presentations, bulletin boards, posters, e-newsletters, models, assignments and written examination. Evaluation is transparent as it is based on pre-declared guidelines and evaluation rubric.

Admission process

Each candidate will be having a personal interaction and group discussion with the faculty. Walk-ins are permissible provided the seats are vacant. The candidates who are selected after the interaction and discussion will be given the permission to take admission provided he/ she submits all the relevant documents and fees.

The academic year ordinarily commences in July and concludes in May. The dates of commencement and termination of the academic year are subject to variation according to the directives of the University.

Confirmation of admission

A provisional admission requires confirmation by submitting all the relevant documents in original and attested copies and pay the prescribe fees within a stipulated period.
