Center for Heritage Research

SEDA recently launched the Navrachana University Center for Heritage Research to carry out new research investigations in understanding the value and significance of heritage buildings. In a very short period of time, the Center has already garnered international attention through its various initiatives. Students and faculty members work together on projects right from documentation, research, publications and exhibitions as final outputs. All students are welcome to work at the Center under the guidance of faculty.

Center for Public Health

Navrachana University, in association with the University of Arizona, has committed to work towards public health initiatives through the jointly launched Navrachana University Center for Public Health. This Center shall work on several public health issues through an interdisciplinary cross collaboration. The Center will also work on several IT based solutions for health management and reaching out to people in order to spread awareness on public health through tie ups with organizations, schools and government bodies. The Center plans to launch joint programs on public health and its management. The major thematic areas of work for the Center shall be emerging, re-emerging diseases, non-communicable diseases, maternal and foetal health and nutrition, IT solutions for health care, public health education, public health spaces, environmental health and occupational health.

Center for Education Innovation and Research

Center for Education Innovation and Research (CEIR) at Navrachana University, is a unique interdisciplinary platform. It offers an intellectual space for experimentation of ideas/practices in education and contributes the real, in-practice data to policy makers in education. This Center engages with innovation and research in education across all levels from pre-primary to PhD. The output of the Center will be publications, researches, products, programs, conferences, faculty development programs and policy frameworks. CEIR aims to be a thought leader in education.
